Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, 13-21, and 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greinke et al (USPN 5,582,811) in view of Matsumoto et al. (USPN 5,505,929).

Greinke et al. is applied as in the previous office action, paper #4. Greinke et al. teach the purification of an intercalated and exfoliated graphite material. While the highest temperature used by Greinke et al. is 1700 °C, as noted by applicant, Greinke does not limit the upper boundary of the temperature for this heat treatment.

Matsumoto et al. teach a process for the purification of graphite by the same mechanism, a heat treatment in the presence of a halogen gas and preferably under vacuum. The purification can be improved by largely reducing the container pressure at the temperature of 1800 – 2200 °C (column 5, lines 28-30). It would have been obvious to one of ordinary skill at the time of invention to use the higher temperatures of Matsumoto in the purification step of Greinke et al. in order to improve the purification.

Claims 12 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greinke et al. and Matsumoto et al. as applied to claims 1 and 13 above, and further in view of Junittila (USPN 4,533,086).

Greinke does not teach the process of grinding the graphite produced by his method. Junittila, however, discloses a method of grinding graphite materials in order to produce graphite which is ground to a fine particle size, required for lubricants, batteries, pencils, etc. It therefore would be obvious to one of ordinary skill at the time of invention to perform the grinding stage of Junittila on the graphite material of Greinke in order to produce graphite particles suitable for various applications.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
